

MATEUS BONETTE

Applied AI Engineer | Full Stack Developer | Python, RAG, LLMs and LangChain

Itajubá, MG, Brazil

mateus.bonette00@gmail.com | +55 (35) 99818-3459 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer and Applied AI Engineer with 4+ years of experience building end-to-end solutions that connect traditional software with Generative Artificial Intelligence. Specialized in orchestrating RAG pipelines, Autonomous Agents and LLMs (OpenAI, Claude, Gemini) to solve real operational bottlenecks, such as lead qualification in CRMs, automated customer support and proposal generation. Strong ability to understand business rules and work autonomously to deliver clean code focused on problem solving and cost reduction.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS

AI Engineering: Generative AI, LLMs, RAG, LangChain, LangGraph, Prompt Engineering, Embeddings, OpenAI API, Claude, Gemini, AI agents, tool calling, function calling

Backend and APIs: FastAPI, Node.js, Next.js, Express, GraphQL, REST APIs, authentication, CRUD logic, system integrations, workers and internal services

Frontend: Angular, React, Next.js, Tailwind CSS, responsive interfaces, dashboards, UX/UI

Data and Databases: PostgreSQL, pgvector, MySQL, MongoDB, Supabase, pandas, Streamlit, data analysis, SQL queries

Automation and Integrations: Process automation, web scraping, Playwright, Google Sheets, spreadsheet processing, bots, API integrations

DevOps and Environment: Git, GitHub, GitLab, Docker, AWS, Linux, Ubuntu, deployment, version control, VS Code

AI Development Tools: Cursor, OpenAI Codex, Google Antigravity, Claude Code

PROFESSIONAL EXPERIENCE

Full Stack Developer | Applied AI, RAG and LLMs - Moontech

05/2024 - Present | Remote | Full-time

- Designed and implemented production-grade full stack solutions with Angular, Next.js, GraphQL, Python, PostgreSQL, Docker and AWS, connecting product, engineering and operations in internal systems focused on automation, data and Applied AI.
- Integrated LLMs with HubSpot CRM to automate lead qualification, sales support, proposal generation and post-sales support, reducing manual tasks and standardizing commercial funnel steps.
- Implemented Generative AI workflows with RAG, LangChain, LangGraph, PostgreSQL/pgvector, OpenAI, Claude and Gemini for information retrieval, operational automation and integration with internal APIs.
- Built analytical dashboards with Python and Streamlit to centralize operational data, improve information visualization and support data-driven decisions.

Full Stack Developer | Automation, Internal Systems and Generative AI - Pró-Saúde Materiais Odontomédicos

04/2020 - 02/2023 - Itajubá, MG | On-site | Full-time

- Developed internal automations with Python, JavaScript, Google Sheets and APIs for financial, commercial, inventory and operational routines, reducing manual work and improving the reliability of internal controls.
- Created digital systems and workflows for inventory, financial, operational and commercial process management, using Python, JavaScript, Google Sheets, APIs and business rules.

Full Stack Developer | Product, APIs and Digital Solutions - byron.solutions Junior Enterprise at UNIFEI

04/2020 - 11/2021 - Itajubá, MG | Remote | Full-time

- Worked on real client projects, developing websites, landing pages, web systems, automations and digital solutions focused on usability, conversion and business value.
- Contributed to scope definition, backlog organization, prototyping and technical deliveries, connecting business needs with software development.

RELEVANT PROJECTS

FBA Automation - Full Stack Automation for Amazon Operations

Python | FastAPI | React | Playwright | PostgreSQL | Docker | AWS | LLMs | AI Agents

- Designed and implemented a full stack solution to automate operational steps related to supplier, product and commercial data analysis in an Amazon operation.
- Reduced operational analysis time by more than 40%, processing more than 15 spreadsheets per week and automating more than 10 repetitive steps. Structured the backend, frontend, database, Playwright automations and LLMs/agents workflows to support operational decisions and reduce manual work.

Qota Finance - Financial Integration with Amazon

React | Node.js | TypeScript | PostgreSQL | Amazon SP-API | Docker | Dashboards | LLMs

- Developed a full stack application to centralize financial data, orders, purchased products, alerts, margin, cash flow and operational information for an e-commerce operation.
- Implemented integration with Amazon SP-API, LWA authentication, AWS SigV4 signing, background workers and business rules for continuous data updates and organization.

OpenClaw Personal - WhatsApp Bot with AI, APIs and Automation

WhatsApp Bot | APIs | Generative AI | LLMs | Automation | Integrations | RAG

- Designed and developed a WhatsApp-controlled multi-agent platform with an AI Gateway, failover across 5 LLMs and agents for tasks, reminders, ideas, FBA/Lucas 1 and RAG.
- Implemented RAG with LangChain.js, Gemini, embeddings and a local JSON index, running in a self-hosted home lab with systemd, Docker and watchdog.

EDUCATION

Federal University of Itajuba (UNIFEI) - Bachelor's Degree in Computer Science

03/2020 - 12/2025 | Itajubá, MG

- Academic background in software engineering, databases, artificial intelligence, networks, system architecture, full stack, Applied AI, RAG, LLMs, automation and data analysis. Volunteer teacher at CAAI and experience in a junior enterprise.

LANGUAGES

Portuguese: Native | **English:** Advanced Technical Proficiency (fluent reading and writing)
